An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for September is 3.9 percent, eight-tenths of a percentage point below the national rate of 4.7 percent, Craig E. Hartzer, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during September 2001 was 2,991,500.

Indiana's September unemployment rate was lower than Illinois, 5.2 percent; Kentucky, 4.4 percent, Michigan 4.7 percent and Ohio's, 4.3 percent.

"September's unemployment rate does not reflect the events of the 11th. The full impact on Indiana's unemployment rate probably won't be felt until November," commented Hartzer.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 3,005,600, a decrease of 29,000 from one year ago but 43,000 more than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 656,500 in September, a decrease of 30,400 from last year. Motor vehicle manufacturing accounts for 94,700 jobs, 7,100 less than one year ago. Manufacturing of motor vehicle parts totals 60,700. Industrial machinery manufacturing in September accounts for 69,800 Hoosier jobs, 700 less than August.

Construction employment totals 158,100 a decrease of 3,600 from last month. Of that, heavy construction reports 19,400 jobs, a decrease of 300 from August.

Service producing employment totals 2,184,900 in September, 1,200 more than last year. Transportation and public utilities total 146,700, 2,100 less than August.

Retail trade totals 555,800, 7,100 less than a year ago. Of that, general merchandise

(over)

stores report employment of 80,700, or 2,400 less than last year. Service sector employment, such as business services, computer and data processing, totals 771,200 in September, which is 5,300 more than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,111,500 in September

2001. An estimated 2,991,500 Hoosiers are employed and 120,000 are unemployed.

Indiana's labor force for September 2000 totaled 3,076,200. Hoosiers employed one year ago is estimated at 3,002,200, and September 2000 unemployed in Indiana totaled 74,000. Indiana's estimated unemployment rate one year ago was 2.4 percent, compared with the national unemployment rate of 3.8 percent in September 2000.\*

\*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>.

## Industry Payroll Employment

Selected Categories	September 2001	Change from Aug. 2001	Change from Sept. 2000
Goods Producing	820,700	-7,100	-30,200
• Construction	158,100	-3,600	+200
• Manufacturing	656,500	-3,500	-30,400
Service Producing	2,184,900	+50,100	+1,200
• Retail Trade	555,800	-1,100	-7,100
